Select a DNA sample and run only that subsection

- -This code names the inputs and spits out the name in the output, so you can make sure you have the right one
- If confused about how to put in your own just go to the subsection called 'W for My Data' then 'Data' then find the string AAAAAAAAAAAAAA, delete it, and put in your own, take care to leave curly brackets {} around the DNA string

Run the 'Run this' section

DNA Data

W for Wolf BRCA2 mRNA

Data
